

This is an aerial map of a village in Romania, overlaid with a cadastral system. The map shows numerous land parcels, each outlined in red. Each parcel is labeled with a unique identification number and the owner's name. The parcels are distributed across the village, with some larger parcels and many smaller ones. The map also shows a network of roads and a river flowing through the landscape. The background is a satellite image showing fields, forests, and some industrial areas.

Key features of the map include:

- Parcel Identification:** Each parcel is labeled with a unique identification number (e.g., 0001/01001, 0002/01002) and the owner's name (e.g., Gheorghe, Maria, Vasile).
- Parcel Boundaries:** Red lines delineate the boundaries of each land parcel.
- Buildings:** Many parcels contain buildings, which are shown as small, dark shapes on the map.
- Roads:** A network of roads is visible, connecting different parts of the village.
- River:** A river flows through the landscape, providing a natural boundary for some parcels.

The map is a detailed representation of the land ownership and boundaries in the village, providing a clear view of the cadastral system.
